### PROFILE:

---

QA Testing with 1.9 years experience in IT industry. To pursue a highly challenging career in the field of IT where I can apply my knowledge and experience, acquire new skills with a team of professionals and provide value addition work to the organization.

### EXPERIENCE SUMMARY:

---

- QA Tester in **Manteio IT Solutions**, I Have 1.9 years of experience in **Manual Testing and Functional Testing**.
- Experience in the IT industry involving all stages of **STLC** and **SDLC** Cycle.
- Tested **API's** using **Postman Tool**
- Proficient in devising all artefacts of testing such as **Test Plan, Test Strategy, Test Scenarios, Test Cases, Defect reports and Test summary report**.
- Work experience on **Agile Model, Sanity Testing, Regression Testing, and Black box testing**.

### SKILLS:

---

- |                        |                       |
|------------------------|-----------------------|
| ● Manual Testing       | ● API Testing         |
| ● Regression Testing   | ● Integration Testing |
| ● Selenium with Python | ● Functional Testing  |

### PROJECT:

---

**Project Name: Safe Home (In-House Product)**

**Testing Tool: Manual Testing, API Testing & Mobile Testing**

**Duration: June 2024 – December 2025**

#### Project Details:

The software for gated society offers numerous innovative features to help simplify daily chores and improve security standards around gated communities through its Security, ERP & Accounting Management modules. All management committee members get access to a configurable dashboard from where accounts, complaints, communications, staff attendance and amenities can be managed. Vehicle Management, Facility bookings, Maintenance, noticeboard, visitors, daily help is included.

**Project Name: US Tax Accounting**

**Testing Tool: Manual Testing, API Postman**

**Duration: April 2024 – December 2025**

#### Project Details:

The project involves the development of a comprehensive, user-friendly accounting software tailored for the U.S. market, designed to streamline tax-related processes for businesses and individuals. The software

integrates key features such as tax preparation, compliance, and filing. It ensures compliance with U.S. tax regulations (such as federal, state, and local tax codes) and supports forms like W-2, 1099, and various IRS schedules. The system is designed with scalability to cater to both small businesses and larger enterprises, offering multi-user access, role-based permissions, and integration with banking systems and external accounting tools.

---

**ROLES & RESPONSIBILITIES:**

---

- Performed manual testing on US Based accounting web applications to identify software defects and ensure high-quality product delivery.
  - Developed and executed detailed test cases, test plans, and test scripts based on project requirements and functional specifications.
  - Collaborated closely with developers, product managers, and the QA team to understand application functionality and resolve issues.
  - Conducted regression, functional, and API testing to validate product changes and updates.
  - Documented and reported bugs using tracking tools, and followed up on defect resolution with developers.
  - Assisted in verifying software fixes and participated in daily stand-up meetings to discuss progress and challenges.
- 

**ACADEMICS:**

---

- B Tech in Mechanical Engineering from Kamala Institute of Technology and Science (2017-21).

**STRENGTHS:**

---

- Good communication and interpersonal skills.
- Self-learning and understanding ability.
- Confident and quick learner.
- Self-disciplined and hard working.

**Key Achievements:**

---

- Contributed to the timely release of product updates by identifying and documenting critical issues.
- Reduced the rate of production defects by substantial percentage through thorough manual testing efforts.

**DECLARATION:**

---

I hereby declare that all the above information given by me is completely true to the best extent of my knowledge.
