PROFESSIONAL SUMMARY:

QA Analyst with 4+ years of experience in Manual Testing, Regression Testing, and Test Automation using Tosca. Strong expertise in test case design, defect tracking, and Agile methodologies. Currently upskilling in DevSecOps with hands-on experience in CI/CD pipelines, Docker, and automation tools. Built real-time projects integrating AI-based features across frontend and backend systems.

PROFESSIONAL EXPERIENCE:

Tosca Automation Test Engineer | NASCO: Tata consultancy services | Hyderabad | (2024 – Present):

- **Automation Framework:** Designed and maintained a scalable automation framework using Tricentis Tosca, creating reusable Modules and Business Parameters to minimize maintenance.
- **Test Case Design (TCD):** Utilized the TCD section to create requirement-driven test sheets, ensuring maximum coverage with minimal test cases.
- **Execution Efficiency:** Configured Execution Lists and integrated DEX (Distributed Execution) to run nightly regression suites, providing faster feedback to the development team.
- **Collaboration:** Mentored junior testers on Tosca best practices and helped transition 30% of the manual testing team toward automation workflows.

Senior QA Analyst (Manual Testing) | NASCO | Hyderabad | (2022 –2023):

- **E2E Testing:** Performed end-to-end manual testing for complex web applications, identifying critical business-logic bugs before production releases.
- **Defect Management:** Managed the end-to-end defect lifecycle in Jira, from discovery to re-testing and closure, maintaining a <5% defect leakage rate.
- **Data Management:** Used Test Data Service to manage dynamic test data for different environments (SIT).

Junior QA Tester | NASCO | Hyderabad |(Before –2022):

- Test Documentation: Authored 500+ manual test cases and maintained the Requirement Traceability Matrix (RTM).
- Regression Testing: Executed monthly manual regression cycles for high-traffic modules, ensuring no regressions occurred post-hotfix.
- Stakeholder Interaction: Facilitated SIT sessions with business users to gather feedback and ensure software met business requirements.

TECHNICAL SKILLS:

Testing:

- Manual Testing, Regression Testing, Functional Testing
- Test Case Design, Defect Tracking

Automation:

- Tosca
- Playwright (Basics)

DevOps / DevSecOps:

- Jenkins (CI/CD Pipelines)
- Docker (Basics)
- Maven

API Testing:

- Postman

Version Control:

- Git, GitHub

Database:

- SQL (Joins, Data Validation)

Other:

- Agile / Scrum
- Generative AI (Basics usage & integration)

PROJECTS:

Desirootworkers (AI-based Marketplace Application):

- Developed a full-stack application with frontend and backend integration
- Implemented AI-based features for improved user experience and content handling
- Designed modules such as:
 - Feed (like, save, star functionality)
 - Marketplace
 - User interactions
- Worked on API integration between frontend and backend
- Performed manual and API testing for all modules
- Validated end-to-end functionality across features

Technologies Used: Frontend, Backend APIs, AI tools, Git ,SQL

CI/CD Pipeline with Automation & Docker Integration:

- Built an end-to-end CI/CD pipeline using Jenkins
- Integrated GitHub for continuous integration
- Automated testing using Playwright and Tosca
- Performed API testing using Postman
- Created Dockerfile and containerized application
- Implemented basic security practices in pipeline
- **Tools Used:** Jenkins, Docker, GitHub, Maven, Postman, Playwright, Tosca

KEY ACHIEVEMENTS:

- Improved regression testing efficiency using Tosca automation
- Reduced manual effort through structured test execution
- Built real-time DevSecOps pipeline project
- Developed and tested AI-based application (Desirootworkers)

EDUCATION & CERTIFICATIONS:

- B. Tech. – Mechanical engineering | Kamala Institute of Technology and science Karimnagar|
June 2017 – May 2021
- Tricentis Certified: Automation Specialist Level 1 (AS1) & Level 2 (AS2)

SOFT SKILLS:

- Communication & Collaboration
- Problem Solving
- Time Management
- Adaptability
