

MANOJ CHARY MATURI

SW QA Engineer | Tosca Automation Engineer at TCS, Hyderabad

+91 8125197506 | ManojMaturi9394@gmail.com | GitHub: github.com/Manoj4134/ai-career-app

TECHNICAL SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, SIT, UAT, Defect Tracking, Postman, API Validation

Automation: Tricentis Tosca, Playwright (Basics)

DevOps / DevSecOps: Git, GitHub, Jenkins, Docker, Maven, CI/CD Pipelines, AWS, Linux

Database: SQL, PostgreSQL, Supabase

Other: Agile, Scrum, Jira, Generative AI, AI Feature Testing

PROFESSIONAL EXPERIENCE

SW QA Engineer | Tosca Automation Engineer | Tata Consultancy Services | Hyderabad | 2024 – Present

Act as client-facing QA consultant, collaborating with global stakeholders, Product Owners, and SMEs to define sprint scope, testing strategy, and quality gates

- Design, develop, and maintain Tosca automation frameworks (modules, execution lists, reusable components) for enterprise-grade applications including SAP-aligned workflows
- Conduct end-to-end test case design, execution, and defect lifecycle management across functional, regression, system, and SIT phases
- Manage Distributed Execution (DEX/AOS) for large-scale, parallel regression runs — reducing cycle time significantly
- Perform manual and automated testing on UI, backend, API, and mainframe (TSO/ISPF, JCL) systems
- Integrate automation suites into CI/CD pipelines using Azure DevOps and Jenkins for continuous quality delivery
- Generate comprehensive test reports, automation metrics, and quality dashboards for senior stakeholders and global clients
- Lead root cause analysis for defects and drive resolution across cross-functional Agile teams
- Improved overall regression efficiency by ~40% through strategic automation and reusable component development

Senior QA Analyst | Tata Consultancy Services | Hyderabad | 2022 – 2023

- Performed end-to-end manual testing for enterprise healthcare applications.
- Executed regression, functional, and integration testing across multiple releases.
- Managed complete defect lifecycle using Jira from identification to closure.
- Validated business requirements and maintained low defect leakage.

Junior QA Tester | Tata Consultancy Services | Hyderabad | Before 2022

- Created and maintained 500+ manual test cases and RTM documentation.

- Executed monthly regression cycles for high-priority modules.
- Supported SIT testing and stakeholder validation activities.

PROJECTS

AI Career App – AI-Powered Learning & Interview Preparation Platform

- Performed API testing and validation using Postman.
- Containerized applications using Docker and implemented basic DevSecOps practices.
- Automated testing workflows using Tosca and Playwright.
- Built CI/CD pipelines using Jenkins integrated with GitHub repositories.

CI/CD Pipeline with Automation & Docker Integration

- Worked on AI-driven course explanations, interview preparation workflows, and dynamic content generation features.
- Integrated DevOps concepts such as Docker, Jenkins, CI/CD workflows, and GitHub version control.
- Performed manual testing, API validation, regression testing, and end-to-end testing for multiple application modules.
- Implemented responsive UI improvements for mobile and desktop platforms with continuous feature enhancements.
- Worked on frontend and backend integration using modern web technologies and deployed applications using Vercel.
- Integrated AI-powered mock interview features with HR and technical question simulations for real-time practice.
- Developed a full-stack AI-based career preparation platform with modules for IT courses, government exams, mock interviews, and communication practice.

Desirootworkers – AI-Based Marketplace Application

- Developed and tested a full-stack application integrating frontend and backend systems.
- Worked on AI-based features for enhanced user interaction and content handling.
- Performed manual testing, API testing, and end-to-end validation.
- Validated modules such as feeds, marketplace, and user interactions.

CI/CD Pipeline with Automation & Docker Integration

- Built CI/CD pipeline using Jenkins integrated with GitHub.
- Automated testing workflows using Tosca and Playwright.
- Containerized applications using Docker and implemented basic DevSecOps practices.
- Performed API testing using Postman.

EDUCATION

B.Tech – Mechanical Engineering | Kamala Institute of Technology and Science | 2018 – 2021

Diploma - Mechanical Engineering | S.R.R.S Govt polytechnic college | 2015-2018

CERTIFICATIONS

- Tricentis Automation Specialist Level 1 (AS1)
- Tricentis Automation Specialist Level 2 (AS2)

SOFT SKILLS

Communication, Collaboration, Problem Solving, Analytical Thinking, Time Management
